

# VIESA INTERNAL / PLATINUM

## EVAPORATIVE SYSTEM

- VIESA INTERNAL – 12 VOLT & 24 VOLT
- VIESA PLATINUM ROOF MOUNT – 12 VOLT & 24 VOLT

**Viesia Internal & Platinum roof mount – (They are the same unit but the Internal is fitted on back wall of sleeper and the Platinum is fitted on roof of sleeper).**  
**The Viesia Internal and Platinum are designed for all trucks 12 or 24 volt with any size sleeper running in dry weather conditions. This unit will need annual servicing to keep it running at its full potential.**

### PROS:

- Fast / cheap to fit / run (water based)
- 6-8 hours usage time depending on truck batteries
- Annual servicing \$190 + GST Approx.
- Quiet to run
- 1 year warranty

### CONS:

- Cannot use while driving
- Will not blow cool air in humid conditions

### TECHNICAL FEATURES

- Automatic drying system of an evaporator
- Maintenance reminder
- Full remote control
- LCD digital board, with command of all the functions. Symbol indication
- Clock and alarm clock
- Aerodynamic exterior design
- Evaporating unit lid with UV protection
- Manufactured according to EMC electromagnetic compatibility
- Air distributor vent for driver and co-driver, with hermetic closure
- Turbo fan with shielded engine and mounted on bearings
- 8-speed turbo fan
- 32-litre water tank with pump cover
- Anti-spoil system with water return, which performs perfectly in any type of inclines
- Water level sensor
- Pump switch-off and signal due to low water level
- Automatic equipment shutdown due to low battery voltage
- Protection fuse in the general feeding cable
- Optimises cooling capacity since it's protected from the sun
- Operate day or night
- Water warning light
- Protection system for short circuit or high voltage
