

PURE AIR

REFRIGERATED - BATTERY OPERATED - 1KW

- 12 VOLT & 24 VOLT

The Pure Air can come with or without 2 x auxiliary batteries and charger, we recommend buying the additional batteries and charger as you will get a longer usage of the unit. The batteries will charge when the truck is driving. The Pure Air will suit any type of truck with a small to medium sized sleeper cab. This unit is designed for an internal fitment (back wall of sleeper only). It works exceptionally well in both dry and humid weather conditions.

What is the difference between Viesia Kompressor and Pure Air?

Viesia Kompressor only comes in a roof mount style - Pure Air only comes in internal style.

Viesia Kompressor only comes in 24 volts (can be converted to 12 volt at extra cost) - Pure Air comes in 12 volt and 24 volt

Viesia Kompressor is a smaller compact unit - Pure Air is more bulky

PROS:

- Internal
- 1 kw - 28 amps continuous
- Can run on its own set of batteries and charger (highly recommended as you will get longer running time. Approx. 7 hours)
- Quiet to run
- 1 year warranty
- Remote control

CONS:

- Cannot use while driving
- Only comes in an internal style
- Will not keep a large sleeper cab cold

OPTIONAL RECOMMENDED

Independent, sealed, deep cycle battery system managed by Redarc DC/DC charger, this gives you longer sleep time, whilst not affecting your truck battery. Batteries are universal to suit your truck.
